

## SEARCH & SELECTION

---

Product Owner, Secomea Copenhagen

---

Are you the new Product Owner we are looking for to join the Research and Development department at Secomea?

In the position as Product Owner in Secomea you will be responsible for defining and delivering high-quality products by working with developers, designers, testers, product manager and other stakeholders. It is the Product Owners responsibility to enable reaching overall goals or product visions by breaking it into smaller segments a.k.a. user stories by collaborating with the Development Teams and Product Management.

It is important that you have a strong capability to help developers understand what needs to be built and why it is important to do so, drawing on your technical skills.

Furthermore, you will be responsible for driving the release planning and process and collaborating with Product Management and Solution Design.

### Further responsibilities

- ✓ Overseeing all stages of product creation including design and development
- ✓ Own the Product Backlog, with a focus on maximizing product value and representing the needs of users
- ✓ Adhere to Scrum theory, practices, and rules, and participate in Scrum events as a Scrum Team member
- ✓ Identify risk and issues, communicate it to stakeholders and drive it to a resolution
- ✓ Accepting or rejecting completed work from the team based on acceptance criteria
- ✓ Performing demos regularly and collecting feedback from stakeholders/users
- ✓ Collaborating with prospective users and clients to understand and anticipate their needs and translate them into product requirements

### Professional qualifications

- ✓ 3+ years' experience in managing software requirements or product backlog
- ✓ Strong technical understanding
- ✓ Good UI/UX understanding
- ✓ If you have experience from the Food & Beverages or the pharmaceutical industry it is a plus, but not a must
- ✓ Strong communication and presentation skills, both verbal and written, in English

### Your profile

You are a person with great energy, and you have a welcoming approach to both colleagues and tasks. You overcome and solve problems in a positive way.

You are structured, analytical, and a logical thinker. You are goal-oriented and able to decide when and which development tasks must be prioritized.

You have strong communication skills and can clearly express your opinion and expectations.

You are able to build and maintain a strong working relationship with a variety of stakeholders from different functions within the business at all levels.

## SEARCH & SELECTION

You are ambitious on behalf of the business, which you strive to develop through close collaboration between designers, developers, testers, product managers and other stakeholders.

You meet challenges with a focus on results and innovative solutions.

### Working at Secomea

We offer a career with flexibility, inclusivity and a diverse and global work environment. We rely on initiative and an open mindset, where your creativity and dedication come to use in an open and positive work atmosphere. As we are fast-growing and constantly expand our business, you will have plenty of chances to grow your responsibilities and competencies whilst working in the heart of contemporary industrial tech.

### Application and information

Send your application and any questions to Trusted Advisor Lars Rohde Innergy by email [rohde@ingy.dk](mailto:rohde@ingy.dk).

We will then contact you as soon as possible. Interviews and presentations of suitable candidates are held on an ongoing basis.

Secomea was founded in 2008 and is today a leading provider of remote maintenance IIoT solutions used by Machine Builders, Integrators and Manufacturers worldwide.

Secomea is headquartered in Denmark with offices in China, Japan and North America and has partnerships with a global network of distributors. We have developed a turnkey solution that combines data collection and remote access in one simple and secure platform, enabling machine administrators to perform all aspects of corrective, preventive and predictive maintenance. We are on a mission to continue to elevate industry standards with a solution that exceeds international security requirements, focusing on scalability and ease of use.

At Secomea we are driven by innovation and agile development, continuously pushing the limits of R&D in close cooperation with our technology partners and customers. We have dedicated ourselves to helping businesses leverage the power of Industrial IoT. By automating communication between equipment and operating systems, the Secomea solution meets the demands of Industry 4.0 and opens industrial solutions in all verticals to new possibilities.
